Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This Office Action is responsive to the amendment filed 10/14/03 in which claim 2 was canceled.

Drawings

1. The drawings were received on 10/14/03. These drawings are approved.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 3-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said bearing elements" in lines 11-14. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 3616

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reese et al. (6,286,857) in view of Halverson et al. (5,330,222).

Reese et al. discloses a towed implement including a frame (24; See Figure 1) having opposite sides spaced transversely from each other relative to a path of travel of said implement, an axle (30) having ends extending transversely beyond said opposite sides (see Figure 3), a pair of ground wheels (28) mounted to opposite ends of the axle, and a suspension for the axle including first and second arms (34) respectively fixed to the axle at locations inward of the wheels; first and second coupling assemblies (38) mounting the arms to the frame and including first and second spherical bearings (38; see column 4, lines 20-25) for normally establishing a horizontal transverse pivot axis about which the arms may pivot vertically but also for permitting said bearings to move into positions for establishing a pivot axis that is not parallel to the horizontal transverse pivot axis without introducing bending loads into said bearings (inherent for the spherical bearings; see also column 4, lines 26-36). Reese et al. discloses cushioning elements (40). Regarding claim 6, shock absorber 46 will substantially prevent movement of the axle relative to the frame when fully extended (brackets 62 and 58 are the respective elements joined by the shock absorber).

Reese et al. fails to show the arms being releasably rigidly fixed to the axle.

Halverson et al. teaches a suspension including first and second arms (116) that are releasably rigidly fixed (by 112) to the axle (42).

Art Unit: 3616

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Reese et al. with the teachings of Halverson et al. to include an releasably fixed axle in order to facilitate repair and replacement of the axle.

Allowable Subject Matter

6. Claims 3, 7, and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Dunn whose telephone number is 703-305-0049. The examiner can normally be reached on Mon-Thur, alt. Fridays, 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 703-308-2089. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-1113.
